

WORK EXPERIENCE AT RED Fire Engineers - Australia

RED Fire Engineers is one of Australia's largest Specialist Fire Engineering Consultancy. Operating within the building, industrial, road and transport, infrastructure, and environmental market segments, we offer excellence in qualified engineering consultancy services. Whilst the company originates from Australia, we have since 2021 a Swedish office started by Martin Johanson (previously office manager Melbourne) and Carl Pettersson (previously office manager Sydney). Within in the RED Family there are plenty of opportunities to gain knowledge and experience from internationally experienced staff and projects across the globe.

Our Melbourne office is seeking applications from students from the Fire Engineering Program to join our team, commencing January 2024.

We have several Swedish fire engineers in our Australian office's and have offered internships for the past 10 years.

THE OPPORTUNITY

The position will provide you with a broad insight into the role of a consulting fire engineer, with exposure to clients, design teams and approval authorities. You will be involved with numerous projects, from the initial phase of preparing fee proposals, design team meetings, detail design and construction inspections.

You will assist our fire engineers with building code assessments and performance based designs. In providing performance based solutions for fire safety design you will undertake qualitative and/or quantitative analyses, inclusive of egress calculations, smoke spread modelling, radiant heat calculations, etc.

You will accompany engineers on site inspections and meetings with clients and approval authorities.

The culture of the RED Family will ensure you enjoy your time in Melbourne outside of work, providing five weeks of paid annual leave for you to see the sights.

QUALIFICATIONS

Students of the Lund or Luleå University Fire Engineering Program.

DURATION

Suggested commencing January 2024 for 12 to 24 months. However, we are flexible with commencement and completion dates.

SALARY

You will be provided with an agreed salary plus superannuation (that is refundable to you upon departing Australia). Four weeks of paid annual leave will be provided. We will also contribute to your airfare and initial accommodation.

VISA

The offer is subject to successful approval by the Immigration Department for both RED Fire Engineers to sponsor the position and your visa application. RED Fire Engineers will arrange the sponsorship application, applicants are required to lodge an individual visa application.

CONTACT PERSON

For further information or your application including your CV, cover letter and course results please e-mail: anna@redfireengineers.com.au.

We look forward to receipt of your application by 1 October 2023.

We welcome any questions you might have. Please do not hesitate to contact us!
